

Diamond Compound

D-M-E Diamond Polishing Compound

For High-Quality Mold and Die Polishing

Quality of mold or die finish is frequently an important factor in how a mold or die operates. D-M-E Diamond Compound is proven to produce the finest quality finish with considerable savings in time and labor.

D-M-E Diamond Compound contains no adulterants, nor non-graded, non-working diamond "fines". The precision-graded diamond particles are uniformly and permanently dispersed and blended in a high-quality, universally soluble, synthetic vehicle; giving the best compositions possible. Available in 5 gram and 18 gram sizes.

*Note: Our compounds are not water soluble.
For best results use with our thinning oil. See page 702c*

Useage	Micron Size	Color	Amount	Concentraion	Part #	Price Ea.

Felt Bobs & Lubricant

Mounted Wool Felt Bobs

Our felt bobs are made of pure wool in a broad variety of sizes, shapes, and degrees of hardness - for any finishing requirement. The mandrels are exactly centered for true-running operation.

Shape	Part #	Width	Depth	Price Ea.
	FB503MS1A	1/2"	1"	\$0.73
	FB503MS2A	1/2"	1/2"	\$0.58
	FB503MS3F	1/2"	1"	\$0.70
	FB503MS5A	1/2"	3/4"	\$0.70
	FB503MS6A	1/2"	1/2"	\$0.58
CYLINDERS				
	FB503CB2A	3/8"	3/8"	\$0.39
	FB503CB4	1/2"	1/2"	\$0.40

OS Type IV Lubricant

This low-viscosity, oil soluble lubricant is compatible with oil-based slurries and compounds, including our D-M-E Diamond Compound.

Part#	Description	Price Ea.
OS510-2030	4 oz. Lubricating Oil	\$4.30
