Mold Saver 42510T

NEUTRALIZES CORROSIVE VAPORS

Non-silicone. Eliminates mold build-up. Prevents deposit build-up. Fully paintable. Neutralizes corrosive vapors emitted by flame retardant plastics and PVC during molding. It is imperative that Mold Saver be sprayed into the cavity regularly while molding to prevent mold deposits from forming and attacking the mold. Maximum operating temp. 550°F (old part no. 42516) Net Wt. 16 oz.
