C2 Combination Valve

CPM and Colmonoy combined for superior performance

A Lower Cost Alternative to CPM!

- Substantial savings on larger size valves over full CPM
- Excellent performance in filled and high abrasion material
- Also available with CPM-420V-HT ring & seat for corrosive materials #56 welded to the face.

We are proud to offer a high performance valve, designed to wear well in abrasive materials and offer a viable alternative to more costly metals. The check ring and rear seat on the C2 Combination Valve® are made of CPM-9V. These parts are known as the "wear components" since they receive the majority of the wear from abrasion and cycling. The retainer is made of Nitralloy 135M, Nitrided with Colmonoy welded to the face.

BARREL RESLEEVEING/REPAIR ~HIGH QUALITY, LOW PRICES

■ **Better than the Competition
and much cheaper - compare!**

■ **Quicker
turnaround time;
less down time!**

■ **Available in
D-2 steel,
CPM-10V and
CPM-420V**
