SLIDE®

Mould Saver 42510T

NEUTRALIZES CORROSIVE VAPORS

Non-silicone. Eliminates mould build-up. Prevents deposit build-up. Fully paintable. Neutralizes corrosive vapors emitted by flame retardant plastics and PVC during moulding. It is imperative that Mould Saver be sprayed into the cavity regularly while moulding to prevent mould deposits from forming and attacking the mould. Maximum operating temp. 550°F (old part no. 42516) Net Wt. 16 oz.
