Features and Benefits

Dual-Ring Mold Dating Inserts

- Double indexable: both arrows independently “click into position”
- All inserts remain flush when rotated

Mold Dating Inserts for Blind Hole Applications

- Installs with insert’s capture screw in to the mold plate
- Thru hole not necessary for removal
- Changes and maintenance done in the press

Indexable Mold Dating Inserts

- Provides indexable snap-in-place alignment of arrow
- Unique design keeps inner insert flush for three full turns
- 4mm diameter (available in Indexable Insert only)

Indexable Inserts and Front Removable Inserts

- Provides product traceability
- Allows placement of year, month, day, shift, or numerals (0-9) on part for batch identification
- Easily adjustable inner insert is removable using a screwdriver
- Date-sensitive inner insert can be changed at the parting line without removing outer insert
- Offers a broad variety of insert dating combinations
- Available in 6mm, 8mm, 10mm, 12mm, 16mm, and 20mm diameters

Choose from two styles to suit your application:

- indexable and front removable
