

FROM NOZZLES TO HOT HALVES...
GET EVERYTHING HOT RUNNERS
FASTER THAN EVER

Quick delivery, highly competitive prices, global services – with proven DME quality you can count on.

Faster Delivery, Better Prices

DME has been a leader in hot runner technology for nearly 40 years. But we never stop striving to be a better resource for our customers.

Today, we're pleased to bring you faster delivery at more competitive prices than ever before on all your most essential hot runner systems and components.

What's Your Quick Delivery Need?

DME manifold and component assemblies provide customers with the optimal hot runner technology they employ for a wide range of applications.

- **Manifold & components only**
- **A prewired and plumbed Unitized System**
- **A full-package Hot Half System**

From nozzles to complete systems, DME is at the ready. Call **888-4-DME-HOT** to talk to a DME hot runner specialist and place your order!

Manifold & Components *in as Little as 3 Weeks*

DME manifold and component assemblies provide customers with the foundation for building a world-class hot runner system.

In just 3-4 weeks, you can get a custom manifold and all critical components – including nozzles, heaters, support pads, dowels and terminal boxes – as well as design guide for layout of pocket machining.

The manifold is completely machined with flow channels, both horizontal and vertical, and end plugs to your specifications.

Fast delivery is available on any of DME's open gate hot runner nozzles, including these leading lines:

- **Stellar** – Ideal for your micromolding, tight-pitch needs
- **Galaxy** – For high cavitation needs, proven in up to 96-cavity molds
- **Hot One** – The longstanding industry standard, user friendly & affordable
- **Gate-Mate** – The most economical choice for direct gating
- **Cool One** – The one that started it all and still delivers for your internally heated hot runner system needs

Same Great DME Quality

Sometimes speed means more than fulfilling fast delivery. Sometimes it also means taking care of the legwork you don't have the time to do.

That's why DME offers a full array of convenient, production-ready hot runner systems. Meanwhile, you gain the confidence that comes with DME quality – every step of the way.

Unitized Systems *Simple Setup, Speedy Delivery*

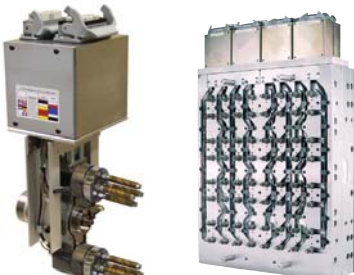

Don't have the time or resources to assemble the manifold and components? Let DME do it for you – and have it ready **in just 4-5 weeks!**

Just drop in your fully unitized open gate or valve gate system, and you're on your way. Everything is plumbed, assembled, pre-heated and tested in our factory before shipment.

Besides saving you valuable time, a unitized system:

- Prevents potential damage (pinched thermocouples, cut wires, etc.)
- Ensures proper wiring and plumbing
- Potential leaks eliminated with properly installed seal rings

Now you can even get unitized models of our proven **Hot One**, **Galaxy** and **Stellar** micromolding systems. So call today and we'll have you running better parts in no time.

Full Hot Half Systems *Your Quick, Complete Solution*

With today's tight timelines, sometimes you need the whole hot half – and you need it now. Good thing you can count on DME for fast delivery of a complete package system matching your unique gate locations, materials and other parameters.

In just 5-6 weeks, you'll get a system that's fully wired with prepped water cooled plates. We take care of all the fitting you would otherwise need to on riser pads and other components – so you don't have to hassle with leaks or other headaches.

With simple machining of the clearance bores, you're ready to bolt on the A plate and start molding right away.

Full Hot Half Systems – Deluxe *Complete Solution with Added Touch*

Pre-Packaged 'Tune Up' Kits

- Nozzle Heaters
- Tip Retainers
- Mold Straps
- Tips/Needles
- Valve Pins and Seals
- Cylinder Re-build Kits

Everything Hot Runners

Fast Delivery. Competitive Prices. DME Quality and Service.

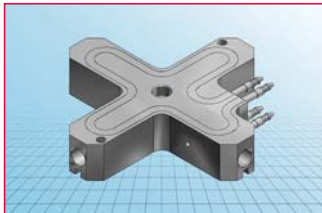

Besides rapid response and reliable performance, count on the unequalled support you've always depended on from DME.

Here are just a few examples of ways we can help you make the most of hot runner technology:

- **Design resources.** CAD geometry for all hot runner nozzles are available online at: http://www.dme.net/dme/resources/cad_library.html
- **Moldflow Modeling.** Comprehensive analysis conducted by certified experts to optimize part and mold design
- **Hot Runner Service Center.** Repair. Reconfigure. Rebuild. Whatever help you need with your hot runner system, our dedicated team is prepared to serve you today

For these and other ways to ensure maximum uptime and performance of your hot runner systems, simply complete an RFQ and we'll return a quote within 24 hours. Visit [dme.net/dme/EverythingHotRunners](http://www.dme.net/dme/EverythingHotRunners) for more information.

Or, if you need a new hot runner system or component right away, don't hesitate to call **888-4-DME-HOT** today.
