

Gate Cutters

NEW POWER-UP GATE CUTTERS

The Power-up cutters are designed specifically for cutting heavy duty large sprues with reduced hand pressure.

The unique design and forging positions the hinge pivot point off-center to create a cam action which increases blade cutting pressure.

Simple mechanical leverage principle reduces the required hand force by up to 50% compared to conventional cutters. The new design of these cutters are ideal for repeat cutting of large, heavy sprues and particularly tough applications such as glass-filled resins.
