Sure Shot Sprayers
For All Light Liquids
Completely portable, no trailing hose or cord • Fully Automatic • Rugged All Metal Construction • Refillable, Reusable • Fast, Convenient, Economical

Directions for Operating Model “A” and Model “C” Sprayers

MODEL A (32 oz.)

1. Remove cap from sprayer.
   Model C capacity: 6 oz.
3. Replace cap and tighten.
4. Charge sprayer with compressed air by holding standard compressed air chuck on valve stem of filler cap. Charge to a pressure of at least 80 lbs (psi). Maximum pressure should not exceed 200 lbs.
5. Sprayer is ready for use.
6. For best results, the liquid used in the sprayer should be lighter than No. 10 engine oil. (If liquid is too heavy a pin stream will result.) Dilute with a suitable dilutent until desired spray is obtained.
Caution: Ammonia solutions should never be used in sprayers.

Auxiliary Pressure Sources
To charge Model A sprayer with CO2 Bulb, replace filler cap (no. 118) with CO2 Filler Unit (Accessory Part No. 450) and use one CO2 Bulb. (Accessory Part No. 455).

Cleaning
If the spray jet becomes clogged, it may be easily removed for cleaning with a needle or a special Clean-Out Pick (optional Part No. 123). The spray jet spiral may be removed from the spray jet with pliers for thorough cleaning.

Valve Lubrication
To correct stuck or dragging valve, loosen Stuffing Box Nut (No. 115) and apply lubricant to the valve stem (No. 110) at the stuffing box (No. 114). Re-adjust Stuffing Box Nut (No. 115) for proper action.
Sure Shot Sprayers
For All Light Liquids

Completely portable, no trailing hose or cord • Fully Automatic • Rugged All Metal Construction • Refillable, Reusable • Fast, Convenient, Economical

Model A Sprayer (1 Quart Capacity)

Two interchangeable spray heads:
• (1) Mist Spray Jet (No. 302) factory installed in operating position.
• (2) Pin Stream Jet (No. 301).

Removeable cap (No. 118) for fast refilling, reuse.

Pressurized by standard compressed air chuck or auxiliary CO2 Bulb.

All brass fittings.

Factory tested for safety to 200 lbs. (psi) pressure.

Choice of tank construction:
• Brass (gleaming chrome plate, corrosion resistant.
• Steel (enameled, four standard colors).

Repair Kits
• Model A Kit No. 5 (includes all parts marked with *).
• Model A Kit No. 10 (includes all parts marked by asterisk except No. 123 which is optional.)

Model C Sprayer (6 oz. Capacity)

Convertible Spray Jet changes from mist spray to jet stream by removal of Spray Jet Spiral.

Removeable cap for fast refilling, reuse.

Pressurized by standard compressed air chuck. All brass fittings.

Factory tested for safety to 200 lbs. (psi) pressure.

Choice of finishes:
• Brass (gleaming chrome plate, corrosion resistant.
• Steel (enameled, four standard colors).

Accessories
Nozzle extension: 3 inch rigid (No. 230).

Repair Kit
Model C Kit 9No. 15) includes all parts itemized above.
